

Attention: City Water Consumers

The new Townsend Water System is set to go live on Tuesday, August 18, 2026. City property owners and residents can expect increases in city water pressure as the new water tower comes online and is placed into service. While the new tower is intended to improve water delivery and service reliability, it may have unintended effects on household plumbing systems. Water pressure is expected to increase from 50-55 psi to 71-77 psi.

If you have questions or concerns, please contact the City at (406) 266-3911 or via email at cityoftownsend@townsendmontana.net

Thank you,
City of Townsend
